WASHINGTON STATE TOTAL LIVING	11,792		5,251		6,541	
Washington State Deaths	7,946		440		7,506	

Notes:

- These data are subject to delays in reporting; adjusted data are presented in HIV/AIDS Epidemiology Reports at <http://www.kingcounty.gov/healthservices/health/communicable/hiv/epi/reports.aspx>. AIDS case numbers are very complete despite delays in reporting, but the HIV case numbers are incomplete mostly due to persons with HIV infection who have not yet been diagnosed.
- Includes presumed heterosexual cases (females who deny injection drug use but have had sexual intercourse with a man whose HIV status and HIV risk behaviors are unknown).
- Residence at the time of diagnosis with AIDS (for AIDS cases) or HIV (for HIV cases).
